

# BlueScope Concrete Services

*WL Concrete is the in-house concrete division of BlueScope Construction. WL Concrete is your single source solution for foundation systems, cast-in-place walls, equipment pits, trenches, tilt-walls, SuperFlat floor slabs, concrete site paving and dolly pads. WL Concrete works nationwide and has an excellent safety record.*

WL Concrete (WLC) brings over 25 years of experience in providing the total concrete package for projects nationwide.

- **Laser-Controlled Grading**

WLC provides subgrade preparation, installation, leveling and compaction of the stone base utilizing the latest laser profiling technology.

- **Foundation Systems**

WLC can offer complete cast-in-place foundation and wall construction using custom form systems and methods for accurate placement of embeds and true finished surfaces.

- **Industrial Concrete Slabs**

WLC can provide state-of-the-art floor slab designs, low-shrinkage concrete mixes and detailed planning. The result is top quality industrial floor slabs that can support aggressive schedules with large placements, SuperFlat tolerances, special finishes and toppings.

- **Concrete Paving**

Use WLC for an economical concrete alternative to asphalt paving with superior durability and life-cycle costs. WLC's large placements utilize the latest dual scope profiling technology with LaserScreed equipment that results in fewer joints and flexibility in scheduling.

- **Tilt-up Construction**

Value engineered tilt-up alternatives can be coordinated with conventional and pre-engineered structural and roof systems to provide competitive shell packages. WLC's complete panel scope includes lift and brace engineering, detailed shop drawings, insulated sandwich panels, custom formliners and integral brick embed systems.

*Poured on site concrete tilt-wall solutions are one of the many services provided by WL Concrete.*

*All types of floor slabs can be provided including SuperFlat floor tolerances, special finishes and toppings.*

*WL Concrete can offer innovative solutions and a high quality finished product for the concrete on your project.*
